19th November 2012

Professor Edre Nagy
President of the Hungarian Society of Endocrinology and Metabolism

Division of Endocrinology
University of Debrecen Medical and Health Centre
PO Box 19, DEBRECEN H-4012, Hungary

Dear Professor Nagy,

On behalf of the organizing committee of the **1st Central European Symposium of Young Endocrinologists (Club 30)** we have a great pleasure in inviting you to participate at the meeting to be held in Wrocław (Poland) from the 8th to the 9th May 2013.

The symposium is being organized under the auspices of the Polish Society of Endocrinology and Club 30. The Club 30 is a newly developed structure of Polish Society of Endocrinology founded in 2012, aiming to integrate young Polish scientists working in the field of endocrinology and related sciences, who have important scientific achievements, while are still under the age of 35. The main goal of the section is to enhance the scientific exchange between the youngest members of Polish Society of Endocrinology by organising scientific meetings, cooperation with other organisations supporting young endocrinologists including Students Scientific Societies and European Young Endocrine Scientists (EYES) as well as subsidizing the scientific projects and participation in congresses.

By organising the international meeting in Wrocław, we hope to create a platform for integration of young endocrinologists representing the Societies of Endocrinology from Central Europe, to reward young scientists by giving them chance to present their work in the front of an international audience including the most prominent members of European Society of Endocrinology and finally, to encourage the authorities of other national societies to similar activity in supporting their youngest members. We have already invited to join our symposium the President of European Society of Endocrinology - Professor Philippe Bouchard and all the Presidents of national Societies of Endocrinology from Central Europe.

The committee would be very grateful if you agree to contribute to our initiative by submitting two chosen abstracts in English prepared by the most active young endocrinologists from your country. The paper should represent the original work of the young endocrinologist and, if accepted, is to be presented at the meeting by its first author. We will be able to cover the congress, gala dinner and accommodation costs for you and both presenting authors. Unfortunately, due to limited budget of the symposium, we are unable to reimburse the travel.

We are looking forward to an early positive response.

With best wishes
Yours sincerely

Andrzej Milewicz
President
of Polish Society of Endocrinology

Marek Ruchala
Vice President
of Polish Society of Endocrinology

Ewelina Szczepanek-Parulska
acting as President of Club 30
of Polish Society of Endocrinology
